Education

MASTER OF COMPUTER SCIENCE

Università degli Studi di Milano

Focus: Data Analysis, Databases, Artificial Intelligence & Business Intelligence

Present

Milan, Italy

BACHELOR OF COMPUTER ENGINEERING

Payame Noor University

Focus: Computer Networks, Software Engineering, Algorithms & Programming

2024

Iran

Skills

Programming: Python, SQL

Data Analysis: Pandas, Exploratory Data Analysis, Data Cleaning

BI & Visualization: Power BI, DAX, Excel

Databases: MySQL, PostgreSQL

Tools: Git, GitHub

Languages: English (B2), Italian (A2), Persian (Native), Azerbaijani (Native)

Data Analysis Projects

BRIGHTCART E-COMMERCE ANALYTICS

August 2026

Personal Project — SQL, Power BI & Business Reporting

- Analyzed e-commerce sales and marketing data using MySQL, CTEs, aggregations and window functions.
- Built an interactive Power BI dashboard using Power Query and DAX to track key business KPIs.
- Evaluated ROI/ROAS, profitability, returns and channel performance to identify revenue opportunities and inefficient campaigns.

HEALTHCARE CLAIMS ANALYTICS DASHBOARD

July 2026

Personal Project — SQL, Power BI & DAX

- Cleaned and analyzed healthcare claims data using SQL, CTEs, window functions and aggregations.
- Built an interactive Power BI dashboard to analyze healthcare spending across claims, procedures, providers and members.
- Developed DAX KPIs including Paid Ratio, Total Paid, Average Paid per Claim and claim volume based on business requirements.

HEALTHCARE DATA CLEANING & SQL ANALYSIS

June 2026

Personal Project — MySQL, SQL & Data Quality

- Cleaned and validated healthcare records using SQL, CTEs, window functions and staging tables.
- Resolved duplicates, inconsistent formats, invalid billing values and conflicting patient data.
- Analyzed hospital revenue, treatment costs and duration to rank high-cost and resource-intensive disease groups.

PAYMENT TRANSACTION DATA MODELING & MONGODB ANALYTICS

March 2026

University Project — MongoDB, NoSQL & Data Modeling

- Designed a UML and NoSQL data model for Customer, Terminal and Transaction entities with relationships and constraints.
- Implemented MongoDB aggregation pipelines, data enrichment and materialized collections for transaction analysis.
- Optimized analytical queries using compound indexes, pre-computation and query execution analysis.

Work Experience

BACK OFFICE INTERN — Tipaxco

2023

Iran

- Worked with operational datasets provided through internal company systems.
- Used Microsoft Excel to clean, organize and validate operational data and maintain data accuracy.
- Identified data inconsistencies, missing information, duplicate records and other data-quality issues.
- Performed data checks and cross-validation to ensure data accuracy and consistency.
