Education

MASTER OF COMPUTER SCIENCE — University of Milan	Present
Milan, Italy <i>Focus: Data Analysis, Databases, Artificial Intelligence & Business Intelligence</i>	
BACHELOR OF COMPUTER ENGINEERING — Payame Noor University	2024
Iran <i>Focus: Computer Networks, Software Engineering, Algorithms & Programming</i>	

Skills

Programming:	Python, SQL
Data Analysis:	Pandas, NumPy, Matplotlib
Databases:	PostgreSQL, MySQL, NoSQL, MongoDB
BI & Visualization:	Power BI, Excel
Tools:	Git, GitHub, VS Code
Languages:	English (B2), Italian (A2), Persian (Native), Azerbaijani (Native)

Data Analysis Projects

BRIGHTCART E-COMMERCE ANALYTICS	August 2026
<i>Personal Project — SQL, Power BI & Business Reporting</i>	
- Analyzed e-commerce sales and marketing data using MySQL, CTEs, aggregations and window functions. - Built an interactive Power BI dashboard using Power Query and DAX to track key KPIs. - Evaluated ROI/ROAS, profitability, returns and channel performance to identify revenue opportunities and inefficient campaigns.	
HEALTHCARE CLAIMS ANALYTICS DASHBOARD	July 2026
<i>Personal Project — SQL, Power BI & DAX</i>	
- Cleaned and analyzed healthcare claims data using SQL, CTEs, window functions and aggregations. - Built an interactive Power BI dashboard to analyze healthcare spending across claims, procedures, providers and members. - Developed DAX KPIs including Paid Ratio, Total Paid, Average Paid per Claim and claim volume based on client requirements.	
HEALTHCARE DATA CLEANING & SQL ANALYSIS	June 2026
<i>Personal Project — MySQL, SQL, & Data Quality</i>	
- Cleaned and validated healthcare records using SQL, CTEs, window functions and staging tables. - Resolved duplicates, inconsistent formats, invalid billing values and conflicting patient data. - Analyzed hospital revenue, treatment costs and duration to rank high-cost and resource-intensive disease groups.	
PAYMENT TRANSACTION DATA MODELING & MONGODB ANALYTICS	March 2026
<i>University Project — MongoDB, NoSQL & Data Modeling</i>	
- Designed a UML and NoSQL data model for Customer, Terminal and Transaction entities with relationships and constraints. - Implemented MongoDB aggregation pipelines, data enrichment and materialized collections for large-scale transaction analysis. - Optimized analytical queries using compound indexes, pre-computation and query execution analysis.	

Work Experience

BACK OFFICE INTERN — Logistics Company — Iran	2023
- Worked with operational datasets provided through internal company systems. - Used Microsoft Excel to clean, organize, and validate operational data. - Identified data inconsistencies, missing information, duplicate records, and other data-quality issues. - Performed data checks and cross-validation to ensure data accuracy and consistency. - Supported the back-office team in maintaining accurate and reliable operational records.
